

Fieldbus Components

Universal industrial fieldbus module ESB

Basis-module for several fieldbus systems
Connectable to RS232, RS485, Profibus-DP, InterBus, CANopen
via exchangeable plug-in card
8 inputs, 8 outputs
Transistor or relay outputs

Industrial plug-in fieldbus cards B-DP, B-CAN, B-IS

Transfers fieldbus-signals into digital TTL-I/Os
For industrial fieldbus module ESB or your specific PLC/controller
Profibus-DP-card up to 12MBit/s
InterBus-card up to 500kBit/s
CANopen-card up to 125kBit/s

Industrial plug-in fieldbus cards V-ESI, B-ESI

Transfers RS232/RS485-signals into digital TTL-I/Os
For industrial fieldbus module ESB or your specific PLC/controller
Your personal computer or PLC becomes a fieldbus-master via the
RS232-interface
without any additional hardware
Easy to install and good price-performance
[Free installation software](#)

AS-i fieldbus optocoupler input module DIAS4, DIAS8

Connects 4 or 8 inputs DC 10-30 to AS-i fieldbus
No operation voltage required
Compact and easy to install
Address free to choose

AS-i fieldbus relay output module DRAS4

Connects 4 relay outputs to AS-i fieldbus
No operation voltage required
Compact and easy to install
Address free to choose

AS-i fieldbus transistor output module DTAS4, DTAS8

Connects 4 or 8 transistor outputs DC 10-30, 0.5A to AS-i fieldbus
No operation voltage required
Compact and easy to install
Address free to choose
