

# Programmable Logic Controllers

## Electronic Programmable Cam Controller

20 years ago we presented as one of the first companies electronic programmable cam controllers. Today our customers profit of our large experience. The new generation: EPC...

Besides of the standard components ZANDER delivers a multitude of customer specified variants and special solutions – just ask us.

Cam controllers are employed everywhere, where actors must be marked exactly in firm assignment to the machine positions, for instance at packing machines.

## Micro-PLC

ZANDER-high-speed Micro-PLC's use a programmable logic instead of a microprocessor. A FPGA-Chip takes over all functions in absolute real time, cycle time 0!

Completely newly and also high-speed: **SPEEDY.**

## Fieldbus-Components

Connection to all current industry-fieldbuses.

ZANDER fieldbus-components can be adapted quickly and simply by a small plug-in card to all current systems.
